

Product Features

La Caja (pronounced "la ca-ha") is a hard, molded plastic carry case with wheels, shaped and developed to transport a 10' x 10' canopy more easily. Grip the soft handle to push or pull La Caja as it smoothly maneuvers through narrow paths. It's rectangle shape and inset wheels make it easy to stack or pack, fitting in spaces a rounded hard case won't. A two-piece box, place the lid over the bottom; luggage straps with clip buckle ends, secured in harness slots, wrap around case and lock.

Case Outside Dimensions	67" x 18" x 11.5"
