* 8' Vortex product parts displayed. 10' Vortex will have additional poles

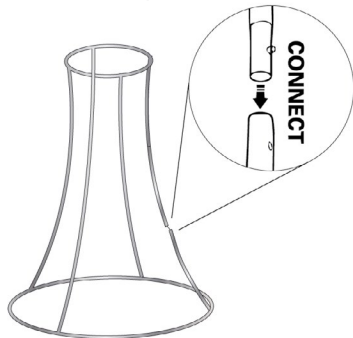

Display Set-Up

Step 1

Begin by removing all parts from the carry case and place on a clean, flat surface. Ensure you have all the components listed above.

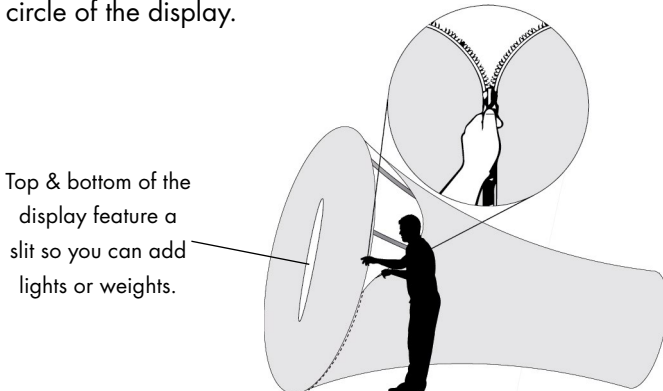

Step 3

We recommend attaching the Vertical Shock-Corded Poles (3) to the top and bottom circles before attaching the individual shock-corded poles.

Step 5

When the bottom of the graphic is taut to the bottom of the display, start to zip the top of the graphic over the top circle of the display.

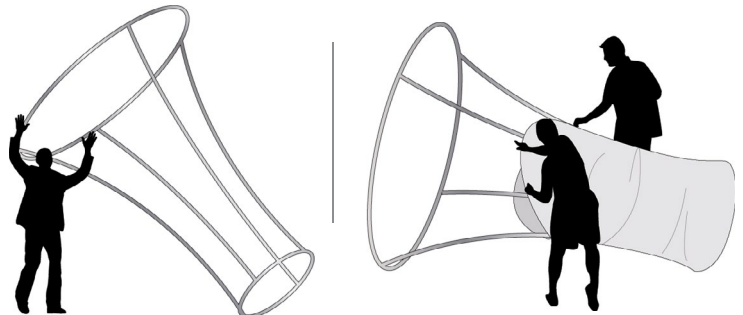

Step 2

Assemble all Bottom Circle Poles (1), Top Circle Poles (2), and Vertical Circle Poles (3) by connecting the corresponding number together while pressing the snap button as shown.

Step 4

Now set the display on it's side. With two people, start to drape the graphic from the bottom circle to the top circle.

Step 5

Stand the Vortex upright to complete assembly of the display.

Storage & Care

Place all product parts into Carry Case and store in a cool dry location. Recommended for indoor use only. Machine wash on gentle cycle using mild detergent. Tumble Dry No Heat. Do NOT dry clean, Do NOT Iron.
