# Setup & assembly

A Phillips head screwdriver is required for installation

1 Unpacking the kiosk

Open the box

A

Remove foam blocks and store for future use.

B

Remove base from side panel. Remove protective bag and store for future use.

C

Using two people, remove kiosk from box.
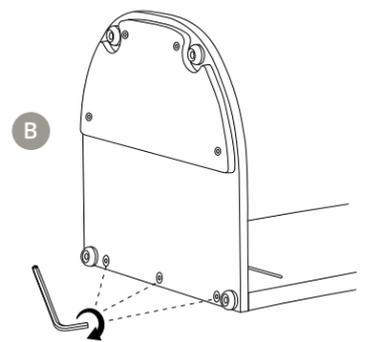

D

2 Attaching the baseplate

1. Set the kiosk onto a sturdy work surface - front down (**See yellow note**)

2. Set the baseplate along the bottom of the kiosk as shown.

3. Secure three 1/4-20 x 1" screws through the baseplate and into the kiosk using the supplied Allen key

4. Ensure these screws are tight

This part is easier with two people
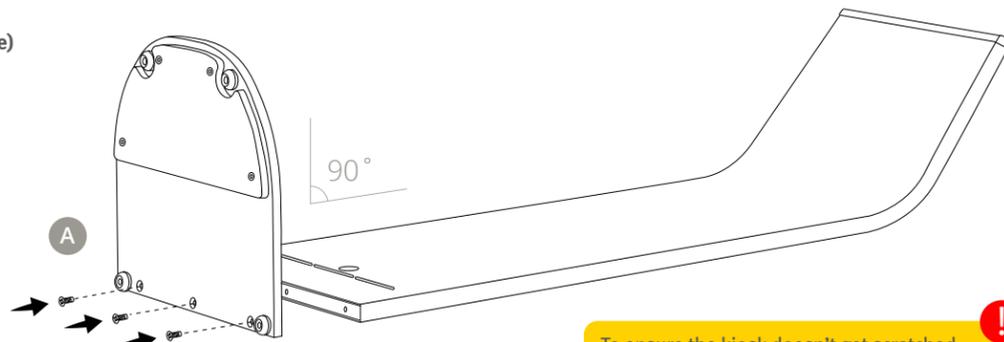

For ease of installation, ensure the baseplate is angled at 90° to the kiosk.
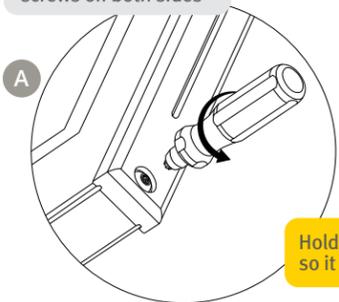

90°

A

To ensure the kiosk doesn't get scratched: leave the kiosk in the supplied plastic bag and place a soft material on the work surface such as cardboard, a blanket or towels

Tighten the three 1/4-20 x 1" long screws using the supplied Allen key

B

Set the kiosk on the floor

3 Removing the tablet carrier

Remove ArmoLock™ screws on both sides

A

Hold onto the bar so it doesn't drop

Remove the top bar and security screws

B

Turn the two tabs securing the tablet carrier out so they are vertical

C
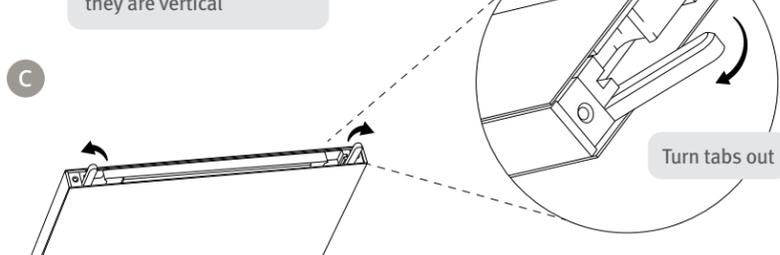

Turn tabs out

Slide the tablet carrier out of the kiosk – grabbing the two finger insets on either side, slightly wiggle the carrier to get it started

D
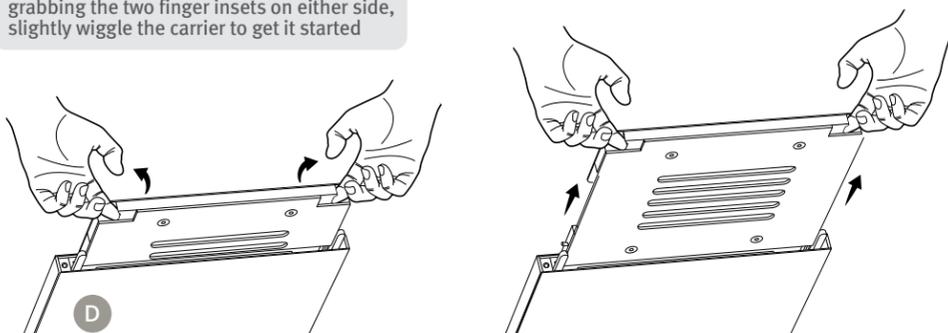

Set the carrier onto a work surface

Setup & assembly

## 4   Routing the power cable

Cables are not included by default due to the large numbers of tablets we typically support

Remove the top and tablet carrier following steps A to E in Section 3

! Ensure the cable doesn't fall into the kiosk from the top

B Route the cable into the kiosk starting at the top of the unit*

A Straighten the cable as much as possible to make it easier to push through the kiosk

C It may take a few tries and trial and error to get the cable close to the hole

D Insert the supplied hook into the hole on the back of the kiosk, hooking the cable* and pulling it out.

Cable options differ and although we suggest routing from the top of the kiosk – some cables will require routing from the bottom › up due to their design and size.

5   Adding the tablet

A Remove the four 8-32 Phillips head screws to remove the tablet frame

B Remove the tablet frame from the tablet carrier and set aside

C Insert the tablet ensuring the power button is accessible — If you cannot access the power button, rotate the tablet 180˚

D Align tablet frame as shown ensuring the red dots align to each other

E Insert the four 8-32 Phillips head screws to secure the tablet

F Final tablet carrier assembly. **Note the pin location for the next step**

G **!** At this step: plug the power cable into the tablet and route it through the cable channel

H Click! Slide the tablet carrier into the kiosk pin first as shown. Align pins with guides on both sides – make sure the tablet carrier is seated all the way down, give it a push

I Once the tablet carrier is inserted into the kiosk, push the carrier towards the front of the unit and turn in both side tabs
Lift tablet carrier & turn tabs in and under

J Align the top bar, ensuring the slots in the bottom of the bar slide over the front and rear panels

K Secure ArmoLock™ screws on both sides
